reference

STRUCTURE

make + **object** + **adjective** / **noun** / **base verb**

Three things can sit after the object, and each one says something different. An **adjective** describes what the object became: *the news made her happy*. A **noun** gives it a new identity: *they made her captain*. A **base verb** says the object was forced to act: *she made me wait*. The verb never takes *to* in the active — but the *to* comes back in the passive.
