READING

Imagine you order a pizza and ten minutes later, it comes from the sky. Or you place an online order for medicine from a pharmacy and the package arrives at your home soon after. Does this sound like a dream? Well, it's quickly becoming a reality for deliveries of food and other products.

Companies in places all over the world, including the U.S., Australia, areas of Europe, and some countries in Africa, have begun making deliveries using drones. Drones cut out the need for traditional delivery methods, which is mainly cars and motorcycles. These vehicles use gas, so drones save on gas use because they don't use this kind of fuel. Drones are also faster and they never get stuck in traffic. They help us in our need to protect the planet and improve traffic conditions.

However, not all companies are able to use drones because starting a drone service is expensive. Even though they're less expensive than using cars, they cost a lot for a company to set up a drone system. You'll likely only see large companies and chain stores making use of them.

Some people wonder how drones work. They don't actually land in your yard or your front doorstep, but instead, they drop the package from above. A little parachute opens and the package falls slowly—and safely—to your home.

Drones aren't just used to send consumer products. In places like Rwanda, some areas are hard to reach, so it's useful to have a way to deliver emergency supplies fast. And because these supplies can go bad quickly, fast delivery is even more important.

We're probably a long way from seeing packages raining out of the sky any time soon, but don't be surprised if you see one because it might be someone's lunch!

16 Read the article. Match the places in the text to the cause-and-effect statements.

- | | |
|-------------------------|---|
| 1 Middle of Paragraph 2 | a) Because drones fly, they can get to places that are difficult to get to in other vehicles. |
| 2 End of Paragraph 2 | b) Drones don't need to land on a person's property because they can drop the product from above, which will land safely. |
| 3 Paragraph 4 | c) Drones can avoid traffic, so they're faster than delivery vehicles. |

4 Middle of Paragraph 5

d) Drones are good for delivering medicine and other supplies because they can deliver very quickly.

5 End of Paragraph 5

e) Drones don't use regular fuel, so they're better for the environment.

17 Read the article. Choose the best answer.

1 The writer believes drone delivery is _____.

- a. nothing but a dream
- b. a reality no one wants
- c. becoming more popular
- d. not safe for deliveries

2 The writer suggests that drones will _____.

- a. make traffic problems worse
- b. reduce the number of cars on the road
- c. increase the need for gas
- d. lower the cost of goods and services

3 Some companies won't be able to use drones because _____.

- a. they don't like them
- b. it costs a lot to make deliveries
- c. it costs a lot to set up the system
- d. they prefer to use drivers

4 The writer suggests that _____.

- a. people don't know how drones work
- b. people are afraid to see drones in use
- c. people aren't happy about losing private space
- d. people are worried about products getting damaged

5 What might a consumer say about drones after reading this article?

- a. A drone delivery system seems easy to manage.
- b. Drones have a number of delivery benefits.
- c. Drones will take the place of traditional delivery soon.
- d. People will soon want drones to deliver everything.

Sudoku

1 Sudoku is a numbers puzzle with quite an interesting solution. Puzzle players must write the numbers 1 through 9 in nine three-by-three boxes, arranged in a three-by-three pattern. The numbers can't be repeated within any box, row, or column. Some numbers are filled in at the start, then the player must find the rest.

2 Sudoku has been around for over a century, but it suddenly became popular in the 2000s. In 2004, Britain's newspaper *The Times* started publishing Sudoku, and within a year it was everywhere. Other newspapers began printing it and Sudoku game shows started appearing on television. It arrived as an app for smartphones in 2008 and has been there ever since.

3 With any fun challenge that's simple enough to understand, championships follow. The World Puzzle Federation began organizing Sudoku championships in 2006. These have taken place almost every year since then in Europe, Asia, and North America.

4 Now, an average person might take twenty minutes to solve a simple, "very easy" Sudoku puzzle. Solving one faster than this requires a bit of skill and experience. The world record for solving a "very easy" one is 1 minute 23.93 seconds, by Thomas Snyder, who is from the U.S. Snyder, a research scientist, uses Sudoku puzzles to exercise his brain every morning. It helps him think better.

5 There are reasons why Sudoku is still popular today. Mind puzzles are quite good for our brain. One study showed that puzzle players' brains work like those of people ten years younger. In addition, Sudoku has a quality to it that makes you want to continue playing. Once you find a number to complete a box, it's easier to find another, and it encourages you to complete more. It's a useful way to spend your time while waiting at the bus stop or riding the subway to work. It's entertaining and it makes you smart.

18 Read the article. Complete the sentences with one word from the article.

- 1** An important rule in Sudoku is that the numbers 1 through 9 can't be _____ in certain sections of the puzzle.
- 2** Sudoku first appeared in print and TV, and soon after players could solve puzzles on their _____.
- 3** At some point, players started competing in _____ in various parts of the world.
- 4** The world record holder for fastest Sudoku puzzle solver says it helps him _____ his mind.
- 5** The article suggests playing Sudoku is a good way to pass the time on the way to _____.

___/15
