B: _____ work. It's too expensive.
- 5 A: If we remove trash cans, people will have to recycle.
B: _____ we need trash cans too.

___/10

READING

We often think of AI—artificial intelligence—as having a role with computers and online applications. But AI is also used in medicine, finance, and even nature protection. Here are some ways that AI is playing a role in helping nature today.

In Zambia, south-central Africa, people are entering wildlife parks to fish and hunt animals, which isn't allowed. The parks have cameras around the park edges, but staff have to watch the cameras all the time. Now, park staff can use AI to watch the cameras and raise an alarm if someone enters wrongfully. The staff can now do other work, such as care for the animals and their living space.

In Brazil, water levels in rivers and lakes have dropped because of climate change. In such a large country, it's hard to measure water levels. With the use of AI, the government can understand the problem better. And AI is showing the situation to be very serious, which is something the government couldn't know without its help.

In the oceans worldwide, whales face dangers from fishing and climate change. Whales aren't that easy to find. People who work to protect them have a huge task. But interestingly, whales actually sing to each other deep in the ocean, and AI can learn their songs. By using AI to hear their music, people can find their location everywhere and look after them better.

None of these things could happen without the use of AI. Although AI presents challenges, it provides solutions too.

13 Read the article. Match the use of AI to where it's happening.

- 1 Using AI to understand sounds.
a. in Zambia b. in Brazil c. in ocean studies
- 2 Using AI to keep an eye on entrances and exits.
a. in Zambia b. in Brazil c. in ocean studies

- 3 Using AI to watch how water levels are changing.
 - a. in Zambia b. in Brazil c. in ocean studies
- 4 Using AI to send a message when a crime happens.
 - a. in Zambia b. in Brazil c. in ocean studies
- 5 Using AI to know where animals are.
 - a. in Zambia b. in Brazil c. in ocean studies

14 Read the article. Is the statement True, False, or Not given?

- | | |
|--|--------------------------|
| 1 The article suggests that doctors use AI to do their work. | True / False / Not given |
| 2 In Zambia, AI can let the police know when a crime has happened. | True / False / Not given |
| 3 Before AI in Brazil, the government never measured water levels. | True / False / Not given |
| 4 People can find whales because they can hear them sing. | True / False / Not given |
| 5 AI is helping people care for whales in every place on the planet. | True / False / Not given |

___/10

LISTENING

15 (TR 11.1) Listen to the talk. Are these statements *True* or *False*?

- | | |
|---|--------------|
