

Ask what they did.

In English, a performance talk runs on examples and soft questions.

Em inglês, rótulo como **difficult** não resolve nada. Você descreve o que aconteceu, olha a carga de trabalho e fecha com uma data. É a mesma lógica que o RH usa para avaliar e apoiar.

1 · THE CONVERSATION

Four moves, in this order.

Situação: você é do RH e um gestor diz “**Luisa is negative. I don't want her on the new project.**” Não concorde ainda e não discuta. Quatro movimentos, nesta ordem. O trecho em destaque é o chunk: serve para qualquer caso.

1 Ask for an example Antes de concluir, peça o fato. Pergunte o que a pessoa fez, não como ela é.	Can you give me a specific example ? What did she actually do?
2 Describe, don't label Diga o que se viu e se ouviu, sem adjetivo.	Let's stick to what happened : she said the deadline was unrealistic and shared her numbers.
3 Check the workload Antes de falar em atitude, olhe a carga.	Before we call it a performance issue , let's look at her workload.
4 Agree on a check-in Feche com ação, responsável e data.	I recommend we share the extra tasks. Let's check in again in four weeks.

TOO BLUNT · direto demais	SAY THIS · diga assim
She's difficult.	She challenged the new deadline in Monday's meeting.
He's not a team player.	I'd like to understand the collaboration concern. Can you give me an example?
She's burned out.	She's been working late. Let's ask her how she's doing.
You give her too much work.	Her workload has grown. Which task can we move?

Describe, don't label.

Difficult, negative e not a team player são rótulos. Exemplos são fatos. A pergunta de ouro: **What did they actually do?**

Recommend, don't only agree.

I agree fecha a conversa. Em RH, I **recommend... because...** abre a decisão.

Evidence has no plural.

Evidences não existe. Diga **some evidence, more evidence** ou **a piece of evidence**.

Describe signs, don't diagnose.

RH não faz diagnóstico. Diga **She shows signs of overload**, não ~~She has burnout~~.

2 · THE ANSWER

When the manager pushes back.

O gestor quase sempre responde com prazo ou orçamento. Pergunte o que dá para mover ou dividir.

"We still need to meet the deadline."
I understand. Which task can we delay, or share?

"She's my best person. She can handle it."
That's why we should protect her time. Who can take part of it?

"We don't have the budget to hire anyone."
Understood. Could we move one deliverable by a week?

When you are the one doing too much.

Quando a sobrecarga é sua: diga sim ao projeto, mas negocie o que sai.

Say yes, then ask
I'd be glad to join the project. Can we review my current priorities first?

Negotiate
I can do this, but which task should I delay?

Set a limit
I can't take that on this week. I can start on Monday.

Read the workload.

HR doesn't ask who the problem is. It asks what is happening.

Do lado do RH, a pergunta é o que aconteceu e em que condições. Quem domina esse vocabulário investiga melhor e recomenda com mais segurança.

3 · THE TOOL

Situation, behavior, impact.

Um roteiro para falar de uma pessoa sem rotular. Exemplo: o gestor chamou a analista de negativa.

Situation	Quando e onde aconteceu.	In Monday's team meeting.
Behavior	O que se viu e se ouviu. Nada de adjetivo.	You said the new deadline was unrealistic and showed your numbers.
Impact	O efeito, em você, na equipe ou no trabalho.	The team started to talk about priorities.
Intent · optional	Pergunte o que a pessoa queria que acontecesse.	What did you want to happen?
TERM · termo		HOW IT SOUNDS · como se fala na reunião
Workload	Her workload doubled in March. Carga de trabalho, o volume que a pessoa carrega.	
Scope	That task is outside the scope of her role. Escopo: o que o cargo cobre.	
Stretch assignment	It's a stretch assignment, so she'll need support. Projeto acima do cargo atual, para desenvolver a pessoa.	
Employee voice	We need safe channels for employee voice. Canais para o funcionário dizer o que pensa.	
Burnout	The WHO links burnout to chronic workplace stress that hasn't been successfully managed. Esgotamento ligado ao trabalho (OMS).	

4 · FROM THE CLIPS

CHUNK	AT WORK, SAY	· no trabalho
A high performer	👍	She's a high performer. Let's invest in her.
Over-deliver	👍	She tends to over-deliver.
Past the scope	👍	That's beyond the scope of her role.
Labeled	👍	He's been labeled difficult. What's behind that?
Grind it out	👎	She works hard to meet every deadline.
Not a team player	👎	I'd like to understand the collaboration concern.
That's nonsense	👎	I'm not sure that holds up. What's the evidence?
Survival mode	👎	She's working under constant pressure.

Os cliques dão opinião, não pesquisa. Um diz que quem leva rótulo é sempre dos melhores; outro aponta grupos com mais risco de burnout. Nada disso é demonstrado. Uma resposta boa de RH: **The speaker has a point, but we need more evidence.**

5 · FIVE QUESTIONS BEFORE YOU LABEL

- 1 What exactly did she say or do?
- 2 When and where did it happen?
- 3 What was the impact on the team?
- 4 What was her workload at the time?
- 5 What did she want to happen?

Watch out.

Os falsos amigos de quem fala português em conversa de RH.

Carga de trabalho	work-charge	workload	Sobrecarga	overcharge	overload
Suportar	support {aguentar}	put up with	Comprometida	compromised	committed
Atualmente	actually	currently	Evidências	evidences	evidence
