

CONTRACT FILES · WARRANTY AND CLAIMS

The Fine Print, what is actually covered

Not every failed part is Ventix's fault, and not every client agrees with that. Read the policy once, then judge ten cases the way Elena Cruz would.

Aluno _____

Data _____

Documento fictício. Esta política foi escrita para uso didático na EIC. Ventix Compressors, Northwind HQ e todas as pessoas citadas são invenção. Nenhuma empresa real, nenhum contrato real e nenhuma política de garantia real estão reproduzidos aqui. O documento imita a estrutura típica de uma política interna de garantia apenas para que o aluno pratique a leitura desse tipo de texto em inglês.

01 · THE POLICY

Read it once without stopping. Then read it again with a pencil.

VENTIX COMPRESSORS

Internal Policy · Section 4: Warranty Coverage and Claims

4.1 Standard Warranty Period

New units are covered under warranty for fifteen months from the date of shipment, or twelve months from initial start-up, whichever comes first. Failures reported after this window fall outside standard coverage, unless the unit is enrolled in the Extended Warranty+ Plan.

4.2 Preventive Maintenance and Record-Keeping

Coverage requires that maintenance be performed at the published intervals, using genuine Ventix parts and lubricants, with every service logged in the client's online maintenance record under the unit's serial number. A claim with missing or incomplete records can be denied on that basis alone, regardless of the actual cause of failure.

4.3 Authorized Service Only

Any repair, inspection, or part replacement performed by a technician not certified by Ventix will void the warranty for that component, even if the work itself was performed correctly. This includes any non-genuine parts installed during that service.

4.4 Operating Conditions

The warranty does not cover damage resulting from operation outside the specifications listed in the installation manual, including pressure, temperature, or load beyond rated limits. This falls under the client's own operational responsibility.

4.5 Unauthorized Modifications

Welding, drilling, or any structural modification made to the unit by the client or a third party, without prior written approval from Ventix, voids the warranty on the affected section, regardless of whether the modification is related to the eventual failure.

4.6 Oil Sample Requirement

At the time of any failure, an oil sample must be collected and submitted before the failed part is discarded. A claim without a sample can still meet the conditions for approval, but only if the client can show that collecting a sample was truly impossible.

4.7 Client Ordering and Configuration Errors

Requests to return a correctly delivered unit due to incorrect model selection, undersized capacity, or changed requirements on the client's part are not covered. These situations fall outside our responsibility, not Ventix's.

4.8 Ownership Transfer and Registration

Warranty coverage is tied to the end user on file at the time of purchase. If a unit moves to another facility or owner without updating the registration, any new claim may be delayed until Ventix re-verifies ownership.

TEACHER'S NOTE · TWO VERB PAIRS THAT TRICK EVERYONE

void and **avoid** look and sound almost identical to Portuguese speakers, but they are unrelated. To void something is to cancel it or make it invalid. To avoid something is to stay away from it. A modification that voids the warranty has nothing to do with avoiding it. Void significa anular. Avoid significa evitar.

waive and **wave** sound exactly the same and mean completely different things. To waive a requirement is to officially give it up or not enforce it. To wave is to move your hand.

Waive significa dispensar ou abrir mão de uma exigência. Wave é simplesmente acenar.

Write one sentence with **void**, not avoid, and one with **waive**, not wave. Say them out loud before you start the cases.

02 · CASE REVIEW, YOU BE THE JUDGE

Ten claims land on Elena's desk. Read the evidence, tick one box, and write the clause that decides it. One of the ten is not a straight yes or no.

CASE 01

A bearing fails at 10 months. The client's online record shows every scheduled service completed on time, with genuine Ventix parts, by a certified technician.

Ventix Maintenance Portal		Service Record · Serial NW-4471
Last 3 services	Completed on schedule	
Parts used	Genuine Ventix parts	
Technician	Ventix-certified	

☐ Covered ☐ Not covered

Clause _____

CASE 02

To save on costs, Northwind hires an outside mechanic who isn't Ventix-certified for a routine filter change. He installs an aftermarket part instead of a genuine Ventix filter. Weeks later, the motor overheats.

Photographic evidence

Photo taken during teardown. Caveat: the installed part is confirmed as an aftermarket filter, not genuine Ventix, and no service record exists for this replacement.

☐ Covered ☐ Not covered

Clause _____

CASE 03

To meet a tight production deadline, Northwind runs the unit at 130% of its rated pressure for six straight days. A seal fails.

Ventix Telemetry Log		Unit NW-4471 · Pressure Readings Flagged
Rated pressure		100 PSI
Sustained reading		130 PSI, 6 days
Result		Seal failure

☐ Covered ☐ Not covered

Clause _____

CASE 04

A part fails after only three months. The client submitted an oil sample the same day, and every maintenance record is complete and on time.

Ventix Lab Analysis		Oil Sample · Unit NW-3302
Contaminants		None found
Metal particles		None found
Sample submitted		Same day as failure
Conclusion: no signs of misuse or contamination. Consistent with a manufacturing defect.		

☐ Covered ☐ Not covered

Clause _____

CASE 05

A part fails at 8 months, but the technician disposed of it before the required oil sample could be collected.

Ventix Internal Review		Claim Ref. CR-0819 Incomplete
Failure reported		Day 240 (8 months)
Oil sample		Not collected, part discarded
Maintenance record		Otherwise complete
Conclusion: procedural requirement not met. Claim cannot proceed regardless of underlying cause.		

☐ Covered ☐ Not covered

Clause _____

CASE 06

A Northwind engineer welds a support bracket onto the compressor casing to route a new pipe, without contacting Ventix first. A crack appears near the weld weeks later.

Photographic evidence

Photo taken during inspection. Caveat: no approval request for this modification appears in Ventix's records.

☐ Covered

☐ Not covered

Clause _____

CASE 07

An internal wiring fault develops at 6 months, traced to a single wire terminal inside the panel. The maintenance record is complete, the technician is certified, and nothing about the installation was altered.

Photographic evidence

Photo taken during inspection. Caveat: the wire terminal shows heavy corrosion on the connector, but the surrounding wiring shows no signs of external tampering.

☐ Covered

☐ Not covered

Clause _____

CASE 08

Northwind quietly transfers a unit to a sister facility without updating the registration. Months later, the new facility reports a failure and files a claim.

Ventix Registration	Unit NW-2938
Registered site	Northwind HQ, Main Plant
Claim filed from	Northwind Regional, Site 2
Transfer on file	None

☐ Covered

☐ Not covered

Clause _____

CASE 09

Northwind ordered a compressor with less capacity than their production line really needs. Now that their production has grown, they want to return it and call it defective.

Purchase Order	PO #NW-1187 · Northwind HQ
Model ordered	Ventix C-40, standard capacity
Requested by	Northwind production planning team
<i>Signed and submitted by Northwind HQ, confirming the model and capacity prior to shipment.</i>	

☐ Covered ☐ Not covered

Clause _____

CASE 10

A unit enrolled in the Extended Warranty+ Plan fails at 40 months. All maintenance was performed on schedule by certified technicians.

Ventix Extended Warranty+	Enrollment Confirmation · Unit NW-5510
Plan	Extended Warranty+, 5 years
Enrolled since	Month 1 (at purchase)
Current status	Active, month 40 of 60

☐ Covered ☐ Not covered

Clause _____

03 · VOCABULARY, WARRANTY AND CLAIMS

Cover the right column and say the sentence from memory. Then write one of your own for each expression.

DECIDING THE CASE

covered under warranty	<i>This part is covered under warranty, so we will process it today.</i>
void the warranty	<i>Unauthorized modifications void the warranty on that section.</i>
fall outside our responsibility	<i>Ordering errors fall outside our responsibility.</i>
meet the conditions for approval	<i>Without the oil sample, this claim does not meet the conditions for approval.</i>

TALKING TO THE CLIENT

maintenance record	<i>I checked the maintenance record, and everything is on schedule.</i>
loop us in	<i>Next time, loop us in before making any changes to the unit.</i>
process the claim	<i>I am processing the claim now, you will hear back by Friday.</i>
talk through something	<i>Happy to talk through the options with you.</i>

Your own sentences

ANSWER KEY · PARA O PROFESSOR

Destaque esta página antes de entregar ao aluno.

No.	Verdict	Clause	Why
01	Covered	4.1 and 4.2	Within the window and the record is complete with genuine parts.
02	Not covered	4.3	A non-certified technician voids the warranty on that component, even if the overheating turns out to be unrelated to the filter.
03	Not covered	4.4	Running beyond rated specifications falls under the client's own operational responsibility.
04	Covered	4.1, 4.2 and 4.6	Well inside the window, every procedural requirement met. Points to a manufacturing defect.
05	Not covered	4.6	No oil sample, so the claim cannot meet the conditions for approval, whatever the real cause was.
06	Not covered	4.5	An unauthorized modification voids the warranty on that section, whether or not the weld caused the crack.
07	Covered	4.1	Straightforward case inside the window, with no exclusion that applies.
08	Not covered (for now)	4.8	Delayed, not denied. Coverage is tied to the registered end user, so the claim waits for re-verification.
09	Not covered	4.7	A client-side configuration error, not a defect. The unit performs exactly as ordered.
10	Covered	4.1 extended	Extended Warranty+ runs to five years, and none of the exclusions in 4.3 to 4.5 apply.

Caso 08 é o único que não é sim ou não. O aluno que marcar Not covered não está errado no raciocínio, mas perde a nuance: a cláusula 4.8 atrasa a análise até a titularidade ser reverificada, não nega a cobertura para sempre. Vale explorar a diferença entre negar e suspender, que é exatamente o tipo de distinção que o cliente escuta errado ao telefone.
